

About Us

Innovative software products, consulting and planning in the field of urban water management for 30 years

Since 30 years the itwh GmbH has been dedicated and specialized in the development of innovative software products and modern engineering services.

Our company is committed to providing expert advice and planning in the field of applied hydrology. Solid knowledge is the basis of putting forward ideas for new solutions and taking forward-looking measures to solve a problem.

As an independent engineering, planning and consulting company our more than 50 employees work in the best possible way for the good of public institutions, industrial customers and private clients.

In addition to the head office in Hanover, itwh GmbH has branches in Dresden, Flensburg and Nuremberg.
