

SEWER MANAGEMENT OF WASTEWATER FACILITIES FOR THE BEV (SPECIAL AUTHORITY OF THE FEDERAL REPUBLIC OF GERMANY)

Assignment

The BEV is owner of more than 1,000 commercial properties as well as further properties with drainage and waste water facilities of different technical standards. The working group "ARGE Kanalmanagement BEV" is organising the waste water management for the BEV.

The working group was founded by aqua consult Ingenieur GmbH, Hannover and itwh GmbH, Hannover. They organize and plan all technical measures needed to keep the sewer system in compliance with legal requirements.

Example of a BEV property

Scope

- Offering project control services (resource management, schedule control, cost control)
- Setting up and operating a server to manage all project data
- Digitizing all relevant data
- Setting up a central internet portal to provide all necessary information
- Setting up a national network for sewer managers
- Compiling and examining the existing BEV data
- Preparing and organizing work for the property based waste water disposal concepts
- Preparing and organizing the commission of engineering companies as third parties
- Monitoring and quality assurance
